Notes *(for above drivers only!)*

1. All drivers could be deployed on JACE and, often, on Supervisor. Licenses are bound to JACE or Supervisor Host IDs, please provide them when ordering.

2. Drivers for building management system are licensed based on **the number of points**; drivers for smart devices are licensed based on **the number of devices**. OCPP driver is licensed based on **the number of connectors** -- EV charging plugs. EV chargers can have 1, 2 or more plugs each.

3. Drivers for JACE are licenced for a certain number of points or devices. For Supervisor please order one main license and any number of extra licenses. E.g. to deploy Sauter driver on Supervisor with 1500 points, order one DR-N4-EY2-SUP and two DR-N4-EY2-SUP-500 licenses.

4. All drivers are compatible with all OEM versions of Niagara JACE: Vykon JACE, Honeywell Hawk, Trend TONN, JCI FX, Distech Controls EC-Net, GC5 etc.

Niagara AX drivers are available on request. **PLEASE CHANGE PART NUMBER FROM N4 TO AX.** Prices may differ from N4 driver prices! For drivers below
